

## Instructions on how to run the program

When you start the program, it will ask to select between player1 and player2

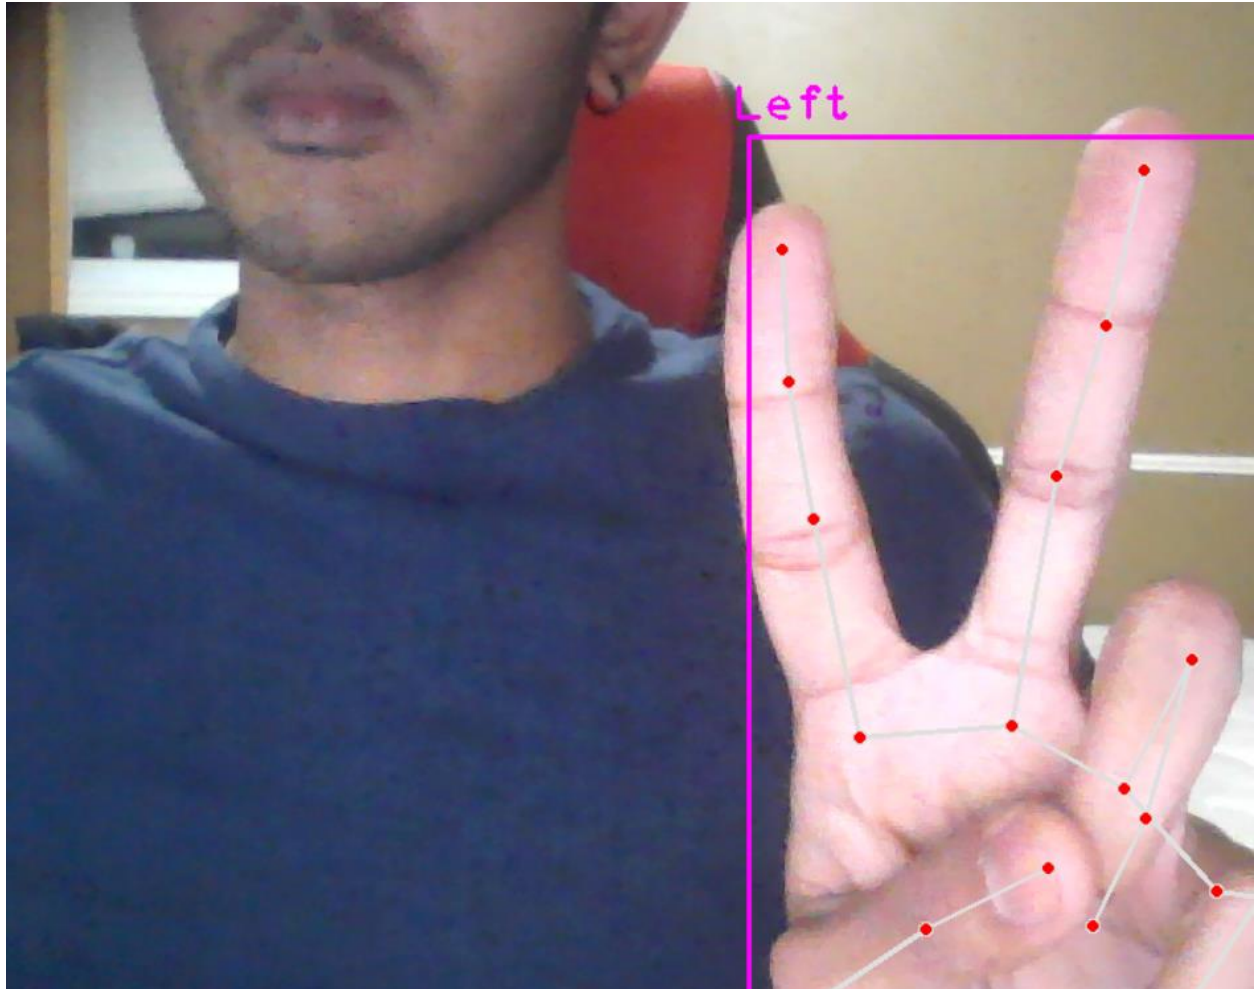

Then you press either 1 or 2 depending on which player you want to use.

A pop up will appear and will tell you to hold the Identification gesture you want to use with your account.

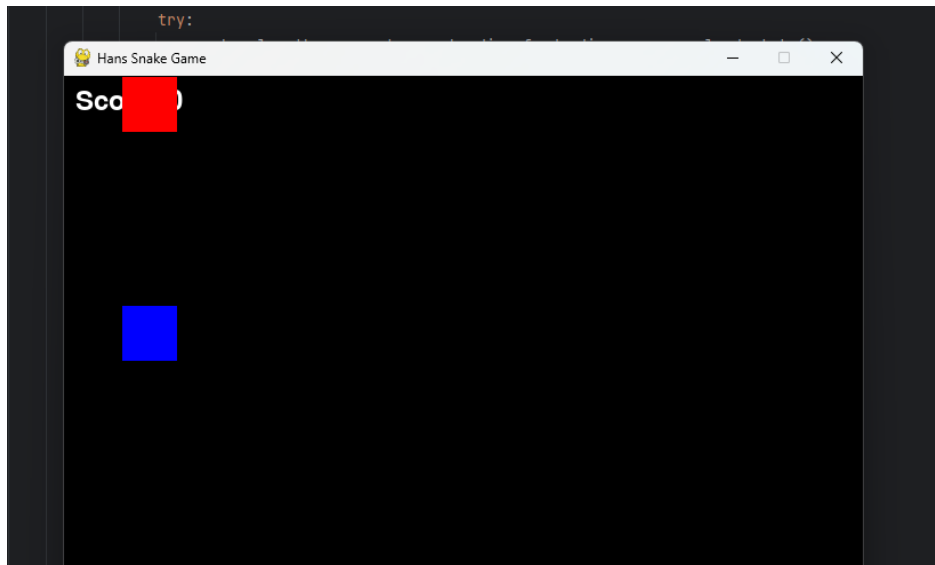

## Instructions on how to run the program

The program will open the webcam and will record your gesture. And save it to the profile you chose.

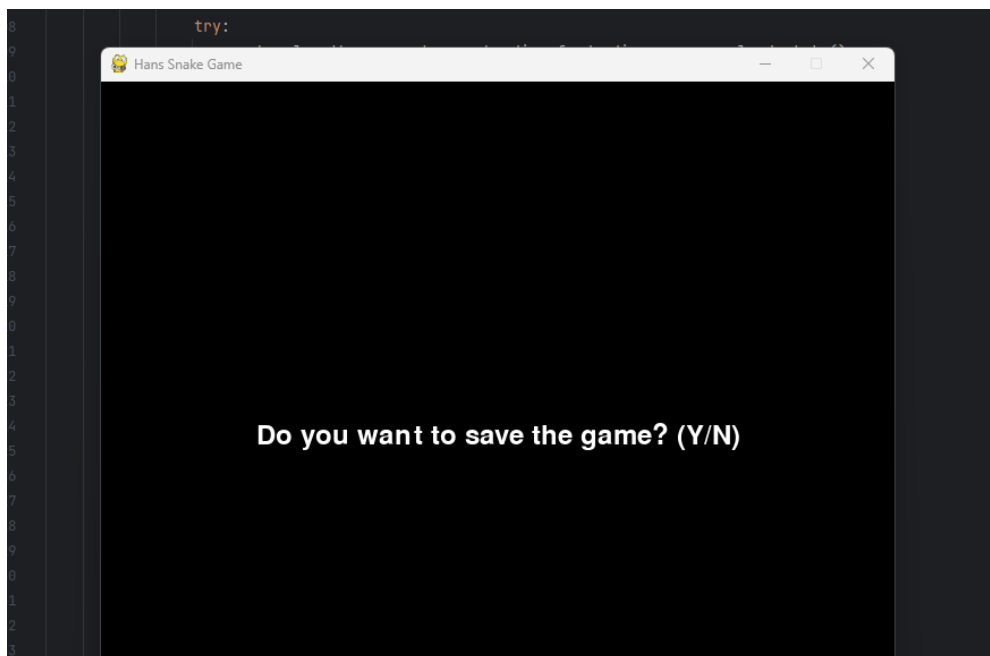

Then the game starts. Use w a s d to control the snake(blue)

## Instructions on how to run the program

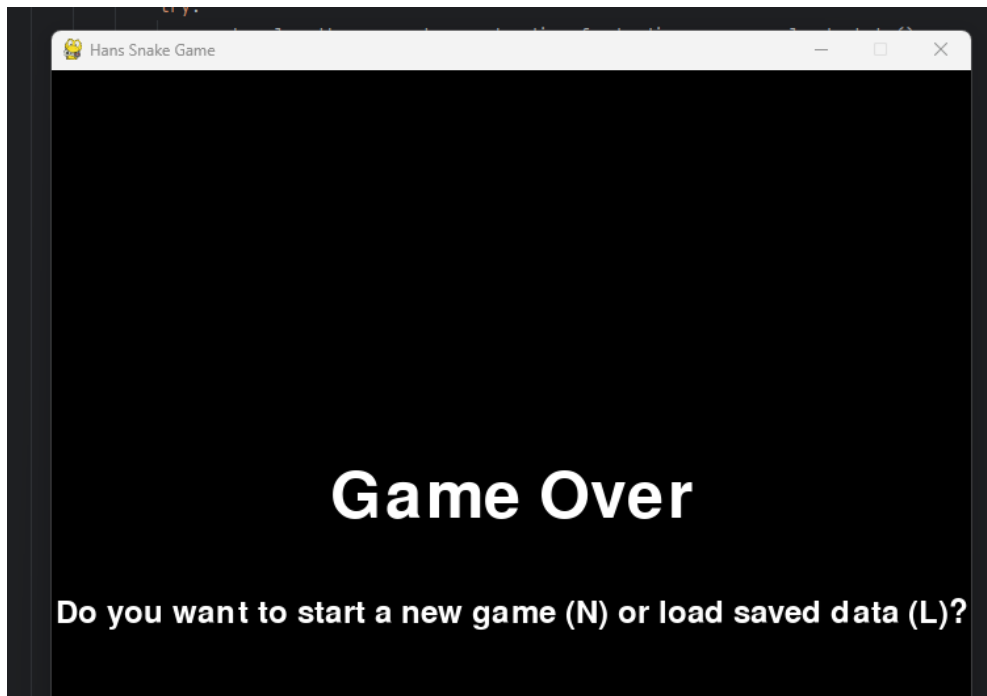

Once you reach a score of 10(or any multiplier of 10) the program will ask you if you want to save your game using n or y.

## Instructions on how to run the program

The game then resumes and you can continue to play. If you die (hit the body of the snake or the border), a Game over message appears and ask you if you want to start a new game or load your save data.

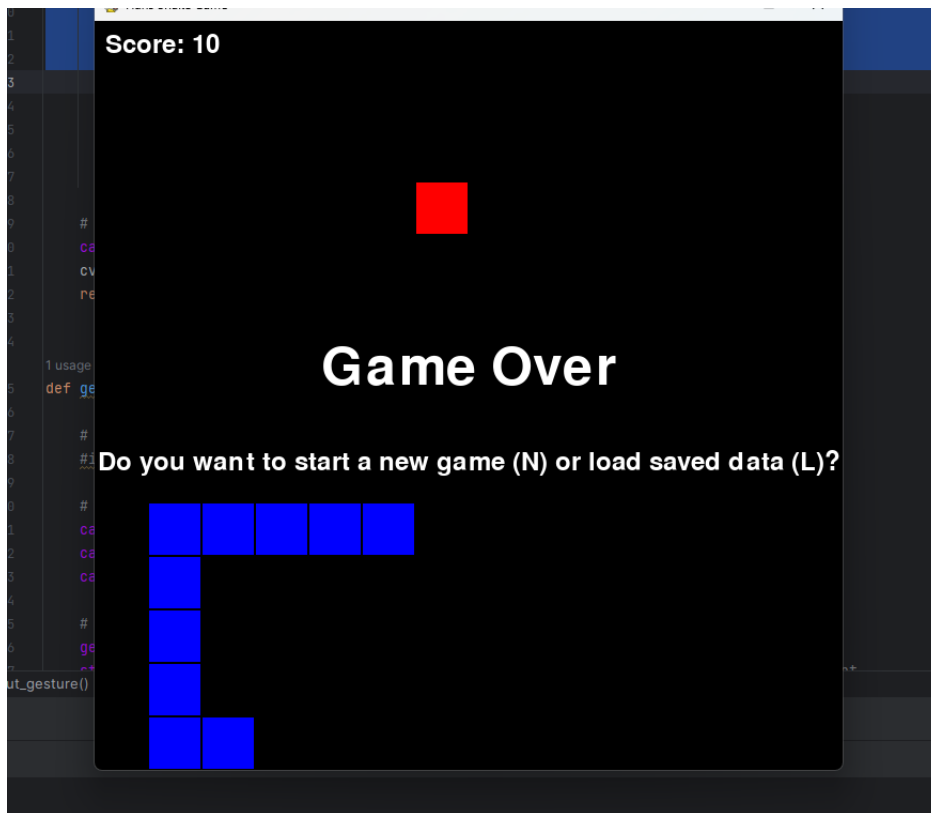

If you select L, the game will re-record your hand gesture and compare with the one you set up at the start of the game.

## Instructions on how to run the program

If both gestures match, the game will resume where you last saved it.

If they do not match, the game will close. Next time the same player logs in, he can resume the game if they show the same gesture assigned to their account.
